

Please DO NOT implement a proposal that will decrease the protections provided by Indiana's current Telephone Privacy Law. We have greatly enjoyed the reduced number of telemarketers at home. Meal time is more pleasant and the number of these calls on the answering machine has reduced as well. This is a program that is working and has been used by a large percentage of individuals. Any time there is an open window to enroll the lines are flooded with callers. Your cooperation in maintaining this law in Indiana would be greatly appreciated and maybe something other states need to consider as well. Thank you.
